Welcome to Intevacon

Our **system** empowers marketers to leverage technology and engage with their most loyal customers.

Our **low price structure** for both the fleet card and the prepaid card allows marketers to capture more revenue and reward customers accordingly.

Our **service** ensures that marketers receive the support needed to grow business.

Fleet Card and Prepaid Card Overview

Marketer

Merchant Location

Merchant Location

Merchant Location

We offer both a proprietary fleet card and a prepaid card to help engage loyal customers and capture revenue.

- The proprietary fleet card offers the ability to provide pricing advantages and purchasing control to customers.
- The prepaid card is a reloadable card featuring optional price per gallon discounts to customers.

How It Works: Fleet Card

Fleet Card Customer purchases fuel from merchant location.

Fleet card is accepted at both the pump and inside the store for payment.

Card authorization is routed to our servers via a gateway device.

The Marketer and the Cardholder are able to view transactions and invoices on the internet.

How It Works: Prepaid Card

Customer purchases the zero balance prepaid card and adds value to it inside the merchant store.

Marketer can discount price per gallon by utilizing features in the point of sale.

Prepaid Card purchases can be made by customer at the pump or inside the merchant store.

Marketer can view prepaid and fleet card transactions on the internet in real time.

Customer has unlimited capability to reload card and return to merchant site.

Features of the Proprietary Fleet Card

Proprietary Fleet Cards

- View real-time transactions
- Special features:
 - Track taxes and tax-exempt customers, apply finance charges, utilize state-of-the-art cost-plus capabilities, apply price adjustments, explicit contract pricing, and site and product restrictions on a card-by-card basis
- Control card purchasing restrictions for drivers and vehicles
- Utilize AR package to generate invoices and receive payments, or transfer to third-party accounting package.
- Generate activity reports.

Features of the Prepaid Card

Prepaid Cards

- View real-time transactions
- Increase cash flow
- Utilize optional feature allowing gallon discounts to customers.
- Enhance security with required PIN.
- Generate activity reports.
- Offer product restrictions as a fleet card alternative for non-credit customers.

Getting Started: Equipment

Connecting to our system is simple.

Internet access required at each site.

Equipment Requirements

- We interface with all major POS systems. Once gateway device is received, connect to secondary or auxiliary network on POS system. This is usually as simple as connecting the cables.

Cards

- We can read existing card layouts. Card replacement is not required when converting to the Intevacon system.
- New cards can be ordered from any vendor of choice. Contact Intevacon for a list of preferred vendors.

Integrity. Value. Confidence.
